DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-31 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Arango (US 5,732,078).

Arango discloses a method for transferring data from a host 210 in Fig. 6, from a first access point 220 to a second access point 240 which are part of guaranteed bandwidth network 260, selectively by guaranteed bandwidth network 260 or WAN 230, comprising the steps of: establishing a connection from the host 210 to access point 220 of WAN 230; line-switching transferring of data through the connection from the host 210 to access point 220 of WAN 230; packeting of the data into data packets, and packet-switching transferring of the data packets through the packet-switching network from the access point 220 to the second access point 240; checking repeatedly whether a control signal exists which is initiated by the host 210 for changing over to guaranteed bandwidth network 260 to the second access point 240; establishing the line switching connection from the first access point 220 through guaranteed bandwidth network 260 with a presence of the control signal, if the line-switching connection is not yet present; changing over to a line-switching data transfer and transferring data over the line-

switching connection via guaranteed bandwidth network 260 to the second access point 240. See column 9-12.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Jonas et al. (US 6,137,792) discloses a method for routing data packets.

Farris et al. (US 6,125,113) discloses an Internet telephone service.

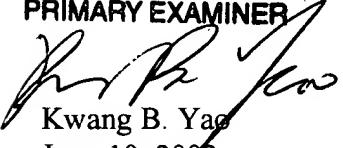

Matsukawa (US 5,598,411) discloses an ISDN terminal adapter.

Tadamura et al. (US 5,157,662) discloses a data communication apparatus.
